is not to scale

WHAT'S IN THE CAPSULE?

Each SITZMARKS® capsule contains **24 radiopaque markers**, which are visible and easy to see before the patient swallows it.

The capsule **dissolves** and releases the markers inside the patient's digestive tract.

YOUR FIRST STEP IN TELEMEDICINE DIAGNOSTICS!

SAVE TIME. GET RESULTS.

Are you or your patient **suffering from persistent constipation**? Are you concerned about what to do next? **SITZMARKS® helps identify physiological causes.** Communicate results via telemedicine when you cannot schedule office visits.

RECEIVE CRITICAL INFORMATION

for your patients who are suffering from persistent constipation using SITZMARKS®. This is a **non-invasive diagnostic tool**, a safe and simple way to help **determine the next steps** to treat constipation.
